Additions on the Amendment Money Bills 2017

Introduction

The submission brings forward some amendments towards the Money bill Amending Procedures and related matters Draft Bill, initiated by the Standing Finance Committee as a Committee Bill to amend Money Bill Procedure and related Matters Bill of 2008 which correlated with section 75 of the Constitution. The drive for this initiative is: The Act assign functions that are not aligned with the Present Resource Allocation, hence, the Bill is to be reviewed.

The section 42 of the Constitution must accommodate the Committees of the finance and its functions. Due to the reason that, the committees because of the powers and its functions conferred to them by all the Legislative bodies, including the constitution, present them as the core bodies of the Legislative Process.

Example of the responsibilities they have: Considering and reporting matters concerning the Parliamentary procedures which include Lawmaking, reporting to the above Houses, refine the rejected laws etc.

The National Assembly, through its committees, assess the performance of the National Departments. The Advisory Board needs the spectators who will evaluate the degree of the quality related to the fitness and procedures of the Board itself. Thus, the number of the constituency of the board to be extended to include the independent spectators, e.g could be Analysts, depending on the choice of the committee, Their important duty must be to make the committee aware of its deviation from the rules in relation to its formulations and acceptability of the policies before they are introduced to the Houses above. That can assist to stabilise the policies and prolong its existence.

To apply the schedule of revenue stated in the Government Gazette of 30-May-2017 and the Act 3 of 2017, as Determination of each Province's Equitable Share of the Provincial Sphere's share of the Revenue raised Nationally {as a direct change against the National Revenue Funds), which is the overall funds of the Local Government share. the structural reformation of the country should focus mostly on the development of the small municipalities. Hence the allocation of the revenue should take place in a vice versa manner, E.g the lowest shares in terms of the allocation for 2017/2018 are: R11719981 for Northern Cape and R24521941 for Free State.

Let these provinces shares being estimated at least with 2% more on their estimated shares. Reasons for this recommendation are:

1. To grow the infrastructure rapidly.
2. To attract the people to migrate to these towns/provinces.
- 3 To close the gap of unemployment and release the congestion in the large towns as well as to pep-up the small towns with fresh mind
4. The innovation in terms of modernised businesses should concentrate in the small municipality areas.
5. Lastly, more work, more happy and comfortable people will be to stabilise the process in relation to the Division of Revenue, the Public Finance Management Act addresses the objectives of the good Financial Management, that can maximise the service delivery and enhance the timely processing of the quality information. The operation of this Bill through the compiling of information according to the changes on the National Budget, enough time and effective, efficient service is suggested. The time stipulated to submit the returned Bill for rectification, to the houses should be increased with reasonable number of the days.

Since the Money bill deals with the entire revenue of the country, the Financial Management in the Parliamentary Budget Office is needed to provide the distinction between the authority

)Director) and the staff. 2. to allow the division of the work so as to simplify its course. The Board will maintain the assessment and analysis of the procdures and constituency of

the board. As much as in the Advisory board, the srutiny towards these structures is of a paramount important, for the firmishing of the policy processing.

All the reformed and amendment information on the Money Bill, should as a stand rule, be ascertained by all the committees on finance before the Provincial legislature event.
