Submission Adjustments Appropriation Bill

Property is protected in every country and without that protection, the ANC runs the very real risk of destroying what little financial credibility remains for South Africa. It is historically not correct blacks owned any of the properties the ANC intends to confiscate without market value compensation as dictated by the constitution. Having already demonstrated its cavalier attitude to the people of South Africa and their property, risking destabilisation due to food shortages and starving people of South Africa, now the ANC seeks to plunder the pensions and savings of hard working citizens.

It is quite obvious that the ANC finds itself in financial difficulties and now seeks to plunder the wealth of productive works instead of putting its own house in order to remove the theft and fraud perpetrated by its own members, none of which have even been investigated or prosecuted. Peoples future is not at the disposal of the large criminal element that exists within the South African government and structures. It is inhuman to place peoples future at the risk of ANC criminality and incompetence. It is common cause the ANC has brought financial ruin to South Africa and the rising debt is unsustainable having only one ending. An certainty unless the ANC immediately gets its house in order and removes the criminal element from its ranks. It is unexceptionable that honest hard working people must now pay to keep ANC criminality alive and well because the ANC cannot remove the now large number of criminals from government.

It can only be hoped that the ANC now behave in a manner more in-line with the promise of sound management and honesty it promised to the people of South Africa so many years ago and the people trusted the ANC to uphold.

Thank you for the opportunity to make a submission.

P Moss.
