Short title and commencement

84. This Act is called the Mineral and Petroleum Resources Development Amendment Act, 2014, and comes into operation on a date fixed by the President by proclamation in the *Gazette*.

MEMORANDUM ON THE OBJECTS OF THE MINERAL AND PETROLEUM RESOURCES DEVELOPMENT AMENDMENT BILL, 2013

1. BACKGROUND

- 1.1 The main objective of the Bill is to amend the Mineral and Petroleum Resources Development Act, 2002 (Act No. 28 of 2002), as amended by the Mineral and Petroleum Resources Development Amendment Act, 2008 (Act No. 49 of 2008), to provide for, inter alia, strengthening of existing provisions relating to the implementation of Social and Labour Plans (SLP's) to augment and substantially increase the socio-economic development impact through mining, enhance the provision relating to the beneficiation of minerals as outlined in the approved beneficiation strategy, streamlining and integrating administrative processes relating to the licensing of rights to provide regulatory certainty, as well as providing for the State's active participation in petroleum development.
- 1.2 The Bill seeks to amend the principal Act to facilitate the smooth implementation of the mining and minerals regulatory framework by aligning it with sound administrative practises and the objects of the Promotion of Administrative Justice Act, 2000 (Act No. 3 of 2000).
- 1.3 The Bill further seeks to amend the principal Act to align the Mineral and Petroleum Resources Development Act with the Geoscience Act, 1993 (Act No. 100 of 1993), as amended by the Geoscience Amendment Act, 2010 (Act No. 16 of 2010), to remove ambiguities that may exist in the principal Act by amending certain definitions.
- 1.4 The Bill enhances integrated licensing in respect of mining rights, environmental authorisations and licenses for the use of water currently resident in various government departments and provides for optimal contribution of the mining industry towards national development priorities, such as energy security. The Bill further enhances provisions which promote mineral and petroleum resources development in a sustainable and equitable manner for the benefit of all South Africans. The Bill furthermore aims to improve the efficiency and efficacy of the legislation in achieving the primary object of creating a mining and minerals regulation regime that conforms to regulatory best practice.

2. SUMMARY OF BILL

- 2.1 The following new definitions are added to the Act; appraisal operations, appraisal work programme, associated mineral, authorised person, Constitution, discovery, free carried interest, gasification, mine gate price, organ of state, production sharing agreement, strategic minerals, labour sending areas, and the definitions of beneficiation, mining area, prospecting area, land, residue stock piles and "this Act" are amplified with a view to provide clarity, certainty and remove any ambiguities and multiplicity of interpretation.
- 2.2 Section 9 of the Act which deals with the order of processing applications is amended by substituting the application process of first come first served with a process in terms of which the Minister reserves a right to periodically invite applications by notice in the Gazette. This invitation process will ensure coordinated quality approvals by the Department that meaningfully contribute towards the fulfillment of the objects of the Act. It will bring about certainty and transparency and further enhance optimal development of the nation's mineral and petroleum resources.
- 2.3 RMDEC is established as statutory body by insertion of clauses 10A to G dealing with the composition, functions and management of RMDEC after section 10 of the Act.

- 2.4 Section 11 of the Act is amended to provide for partitioning of rights, delete reference to close operations and remove reference to time frames and further correct grammatical errors. The rationale for these amendments is to afford the right holders a right to dispose of a portion of their right subject to the provisions of the Act. Further provide opportunity for public entities to mortgage rights without Ministerial consent.
- 2.5 Section 26 of the Act is amended to strengthen the linkages between the mining and manufacturing sectors in order to maximise the value realised from the country's mineral resources by its citizens thus contributing to government's objective of eliminating the triple developmental challenges of unemployment, inequality and poverty. Strengthening these linkages will be achieved by first identifying key mineral inputs into the country's developmental imperatives which include infrastructure development, energy security, food security and industrialisation.
- These key minerals will then be designated by Minister through government *Gazette*, after consultation with Ministers of relevant state departments, as being crucial for local beneficiation. The amendment of section 26, further makes provision for producers of designated minerals to offer a portion of their production to local beneficiaries in prescribed quantities, qualities and timelines at mine gate price or an agreed price. Furthermore, any exports of designated minerals will require Minister's written approval before export.
- 2.6 Sections 70-89 are amended to substitute reference to designated agency for Regional Manager. The designated agency is effectively dissolved and its functions are to be performed by the Regional Managers. The realignment of the functions of PASA is done in order to consolidate the regulation of petroleum resources under the auspices of the DMR, while the promotional aspect is vested with the Council for Geoscience.
- 2.7 Section 86A is inserted to provide for the State participation in petroleum development. The State has a right to a free carried interest in all new exploration and production rights. The section further makes provision for the State to participate at Board level through joint project committee.
- 2.8 Section 96 and relevant sections of the Act are amended to make provision for the Minister to allow for the lodgement of appeals prior to the execution of rights. This amendment is in line with the streamlining of licensing processes between the Department of Mineral Resources, Environmental Affairs and Water Affairs.
- 2.9 Section 99 of the Act is amended to provide for improved sanctions in respect of offences committed under the Act. The offences are now linked to a percentage of a person or right holder's annual turnover and exports during the preceding financial year. Further increased the amount in respect of penalties that may be imposed by a court. Provision is also made for administrative fines. The basis for these improvements is to deter non compliance with the Act.
- 2.10 Section 102 of the Act is amended to introduce subsection (3) which deals with the regulation of exploitation of associated mineral or minerals. The right holders are required to declare and account for the associated mineral or minerals discovered in the mining process.
- 2.11 All reference to specific timeframes in the Act has been substituted with reference to time frames as prescribed. The time frames will be prescribed and fixed in the Regulations. These time frames will not detract from the standard

practice of 30, 60 to 90 days where applicable. These will further and most importantly conform to the principles of lawfulness, reasonableness, and fairness consistent with the Promotion of Administrative Justice Act, 2000 (Act No. 3 of 2000), while allowing for the requisite flexibility where necessary.

- 2.12 The mine environmental management provisions i.e. sections 39 to 42 were repealed by Act 49 of 2008 and transferred to the National Environmental Management Act. In the Bill reference to environmental management programmes and plans has been substituted for reference to environmental authorisations to be issued in terms of NEMA.

The Minister of Mineral Resources is the competent authority to implement mine environmental management in terms of NEMA whereas the Minister of Environmental Affairs is the competent authority to develop, review and amend legislation, regulations and policies relating to mine environmental management. Processes are under way to give effect to this arrangement between the two departments regarding the mine environmental management function which include further refinement of both pieces of legislation to ensure that there is no duplication of mandates.
