**PERSONAL VISION AND CONCLUSION:**

My love and interest in the welfare and wellbeing of children warrants me to want to be part of the education of children and youth across all spheres and boundaries of class, race and ethnicity. I strive to improve my personal targets and application of my duties in the work place and expand my skillset in endeavours beyond my fixed employment profile such as serving on NGO's and being part of charities and boards where I can develop the lives of others and serve people. Thus this opportunity of serving on the NYDA board would be ideal for me to achieve my personal goals of being a servant to the people.

Furthermore I hope to look into starting my own school one day that will cater for special needs children beyond finishing the current schooling curriculum, to formulate a post-school type degree for special needs students which is currently lacking in South-Africa. I also hope to form a foundation that will cater for special after school sport programmes for differently abled and abled athletes coming from special needs schools whom are able to play normal or disabled sports but are disregarded by the system because they don't come from elite or normal schools.

I am in consultations with Rina van Zyl from a reputable training institution whom I frequently meet and collaborate on in business ideas and fundraising prospects for charities, she on her turn guides me in terms of having a sound business mind-set that I believe helps me in my daily decision making processes and broaden my thought process to understand economics which assists me in giving advice to up-coming entrepreneurs.

I will conclude my Honours Degree in 2021 and further my studies until I get a PHD as I believe lifelong learning is vital and forms part of my philosophy to encourage scholars and young people to get education and never to stop innovating themselves.

THANK YOU FOR YOUR TIME
